PROJECTS

Bitcoin Ticker Mobile Application

A cryptocurrency price checking application where people can monitor their bitcoin investments.

Class Attendance Mobile Application

A mobile application developed to facilitate in-class activities such as recording attendance using QR code, online quizzes and displaying the students grades.

Question Bank Website

A website with 3 main user types: Admins, Teachers and Students. Teachers can create questions and exams, Students can access these exams and solve them then they are automatically corrected, and Admins can delete any questions. Authentication and authorization are implemented using Keycloak and the notifications are managed using Kafka.
